Music Therapy Research Study Participants Needed

HAVE YOU HAD A STROKE? ARE YOU LEFT WITH MOTOR IMPAIRMENTS? ARE YOU INTERESTED IN MUSIC THERAPY?

You may be eligible to participate in a study pairing music therapy with non-invasive brain stimulation to investigate motor recovery of the upper extremities following a stroke.

YOU MAY BE ELIGIBLE IF YOU:

- Are an adult (18-80 years of age)
- Had a stroke 3 months ago or longer

YOUR PARTICIPATION WILL REQUIRE:

- 6 sessions over 2 weeks for 60 minutes each and 3 additional meetings
- In-person sessions with a certified music therapy trainer

POTENTIAL BENEFITS MAY INCLUDE:

- Improved upper extremity functioning
- Important feedback for future research and clinical advancement
