

CI- Music Therapy Study

Participants Needed

Do you wear a CI for more than 1 year?

Do you have problems understanding speech in noise?

Are you interested in Music?

You may be eligible to participate in a **music training and EEG study!**

We will investigate the **effects of Music Training** on Working Memory and Speech-in-Noise Perception **in Cochlear Implant Users.**

YOU MAY BE ELIGIBLE IF YOU:

- Are an **adult** (18-80 years of age)
- Have more than **12 months CI** experience

YOUR PARTICIPATION WILL REQUIRE:

- **3 EEG sessions** at the Sunnybrook CI brain lab
- **8 music training sessions** over 4 weeks at UofT with a certified music therapy trainer

POTENTIAL BENEFITS MAY INCLUDE:

- **Improved** speech-in-noise understanding
- **Important feedback** for future research and clinical advancement
- You will be **compensated for your participation** at the end of the study
